## Experiment 5

**Group Members:**

Shreya Shetty 2019140059

Shruti Shetty 2019140060

**Project Title:** Resort Property Management System

**Aim:** To perform Earned Value Analysis

**Activity Duration & Cost Table :**

Phase I

<input type="checkbox"/>	Timeline	Task	Dependency		Activity Node	Predecessor	Duration	Cost/Day	Total Cost
<input type="checkbox"/>		Requirement Analysis			A		4	500	2,000
<input type="checkbox"/>		Defining Problem Statement			B	A	1	600	600
<input type="checkbox"/>		Defining Objectives and Features			C	B	2	300	600
<input type="checkbox"/>		Proposal Documentation			D	B,C	1	200	200
<input type="checkbox"/>		Project Proposal Approval			E	D	1	500	500
<input type="checkbox"/>	+ Add Task								
							9 sum	2,100 sum	3,900 sum

## Phase II

<input type="checkbox"/>	Timeline	Task	Dependency		Activity Node	Predecessor	Duration	Cost/Day	Total Cost
<input type="checkbox"/>		Phase II Documentation and Presentation			L	I, K	1	1,000	1,000
<input type="checkbox"/>		Implementation of Booking System			K	J	6	400	2,400
<input type="checkbox"/>		Implementation of User System			I	H	6	200	1,200
<input type="checkbox"/>		Login-Signup Implementation			H	F, G	2	500	1,000
<input type="checkbox"/>		Implementation of Property System			J	F	6	300	1,800
<input type="checkbox"/>		Database connectivity and setup			G	F	2	500	1,000
<input type="checkbox"/>		Designing UI			F	E	7	1,000	7,000
<input type="checkbox"/>		+ Add Task							
							30 sum	3,900 sum	15,400 sum

## Phase III

<input type="checkbox"/>	Timeline	Task	Dependency		Activity Node	Predecessor	Duration	Cost/Day	Total Cost
<input type="checkbox"/>		Testing			O	M, N	6	300	1,800
<input type="checkbox"/>		Deployment			P	O	8	600	4,800
<input type="checkbox"/>		Phase III Documentation			Q	O, P	5	500	2,500
<input type="checkbox"/>		Final Project Report Preparation			R	Q	6	1,000	6,000
<input type="checkbox"/>		Final Presentation			S	R	6	100	600
<input type="checkbox"/>		Implementation of Payment System			M	L	8	500	4,000
<input type="checkbox"/>		Implementation of Inventory Management			N	M	9	500	4,500
<input type="checkbox"/>		+ Add Task							
							48 sum	3,500 sum	24,200 sum

## Actual % Completed (98 days - till November 2) Table :

### Phase I

<input type="checkbox"/>	Predecessor	Duration	Task	Cost/Day	Total Cost	Activity Node	Actual Complete	Incurred Cost
<input type="checkbox"/>			Requirement Analysis			A	100%	2,000
<input type="checkbox"/>			Defining Problem Statement			B	100%	500
<input type="checkbox"/>			Defining Objectives and Features			C	100%	600
<input type="checkbox"/>			Proposal Documentation			D	100%	300
<input type="checkbox"/>			Project Proposal Approval			E	100%	400
<input type="checkbox"/>	+ Add Task							
						0 sum	500% sum	3,800 sum

### Phase II

<input type="checkbox"/>	Predecessor	Duration	Task	Cost/Day	Total Cost	Activity Node	Actual Complete	Incurred Cost
<input type="checkbox"/>			Designing UI			F	100%	6,000
<input type="checkbox"/>			Database connectivity and setup			G	90%	1,100
<input type="checkbox"/>			Login-Signup Implementation			H	80%	800
<input type="checkbox"/>			Implementation of User System			I	60%	1,000
<input type="checkbox"/>			Implementation of Property System			J	80%	900
<input type="checkbox"/>			Implementation of Booking System			K	50%	1,000
<input type="checkbox"/>			Phase II Documentation and Presentation			L	5%	100
<input type="checkbox"/>	+ Add Task							
						0 sum	465% sum	10,900 sum

Phase III

<input type="checkbox"/>	Predecessor	Duration	Task	Cost/Day	Total Cost	Activity Node	Actual Complete	Incurred Cost
<input type="checkbox"/>			Implementation of Payment System			M	20%	700
<input type="checkbox"/>			Implementation of Inventory Management			N	20%	500
<input type="checkbox"/>			Testing			O	0%	0
<input type="checkbox"/>			Deployment			P	0%	0
<input type="checkbox"/>			Phase III Documentation			Q	0%	0
<input type="checkbox"/>			Final Project Report Preparation			R	0%	0
<input type="checkbox"/>			Final Presentation			S	0%	0
<input type="checkbox"/>	+ Add Task							
						0 sum	40% sum	1,200 sum

### Planned Value (PV):

- Planned Value is the approved value of the work to be completed in a given time. It is the value that you should have earned as per the schedule.
- As per the PMBOK Guide, “Planned Value (PV) is the authorized budget assigned to work to be accomplished for an activity or WBS component.
- The formula to calculate Planned Value is simple. Take the planned percentage of the completed work and multiply it by the project budget and you will get Planned Value.
- The total Planned Value for the project is known as Budget at Completion (BAC).
- $\text{Planned Value} = (\text{Planned \% Complete}) \times (\text{BAC})$
- Planned Value is also known as **Budgeted Cost of Work Scheduled (BCWS)**.

### Actual Cost (AC):

- Actual Cost is the total cost incurred for the actual work completed to date. Simply put, it is the amount of money you have spent to date.
- As per the PMBOK Guide, “Actual Cost (AC) is the total cost actually incurred in accomplishing work performed for an activity or WBS component.”
- Actual Cost is also known as **Actual Cost of Work Performed (ACWP)**.
- Finding Actual Cost is the simplest of all.
- There is no special formula to calculate the Actual Cost. It is an amount that has been spent and you can find it easily in the question.

## Earned Value (EV):

- Earned Value is the value of the work actually completed to date. If the project is terminated today, Earned Value will show you the value that the project has produced.
- As per the PMBOK Guide, “Earned Value (EV) is the value of work performed expressed in terms of the approved budget assigned to that work for an activity or WBS component.”
- Although all three elements have their own significance, Earned Value is more useful because it shows you how much value you have earned from the money you have spent to date.
- Earned Value is also known as the **Budgeted Cost of Work Performed (BCWP)**.
- The formula to calculate Earned Value is also simple. Take the actual percentage of the completed work and multiply it by the project budget and you will get the Earned Value.
- $\text{Earned Value} = \% \text{ of completed work} \times \text{BAC (Budget at Completion)}$ .

## ACWP, BCWP, BCWS Calculations:

98 Days(2 Nov)

### ▼ Phase I

<input type="checkbox"/>	Day	Total Cost	Actual Task Complete	Incurred Cost	Activity Node	ACWP	BCWP	BCWS
<input type="checkbox"/>		Requirement Analysis			A	2,000	2,000	2,000
<input type="checkbox"/>		Defining Problem Statement			B	500	600	600
<input type="checkbox"/>		Defining Objectives and Features			C	600	600	600
<input type="checkbox"/>		Proposal Documentation			D	300	200	200
<input type="checkbox"/>		Project Proposal Approval			E	400	500	500

### ▼ Phase II

<input type="checkbox"/>	Day	Total Cost	Actual Task Complete	Incurred Cost	Activity Node	ACWP	BCWP	BCWS
<input type="checkbox"/>		Designing UI			F	6,000	7,000	7,000
<input type="checkbox"/>		Database connectivity and setup			G	1,100	900	1,000
<input type="checkbox"/>		Login-Signup Implementation			H	800	800	1,000
<input type="checkbox"/>		Implementation of User System			I	1,000	720	1,200
<input type="checkbox"/>		Implementation of Property System			J	900	1,440	1,800
<input type="checkbox"/>		Implementation of Booking System			K	1,000	1,200	2,400
<input type="checkbox"/>		Phase II Documentation and Presentation			L	100	50	1,000

▼ Phase III

<input type="checkbox"/>	Day	Total Cost	Actual Task Complete	Incurred Cost	Activity Node	ACWP	BCWP	BCWS
<input type="checkbox"/>		Implementation of Payment System			M	700	800	4,000
<input type="checkbox"/>		Implementation of Inventory Management			N	500	900	2,000
<input type="checkbox"/>		Testing			O	0	0	0
<input type="checkbox"/>		Deployment			P	0	0	0
<input type="checkbox"/>		Phase III Documentation			Q	0	0	0
<input type="checkbox"/>		Final Project Report Preparation			R	0	0	0
<input type="checkbox"/>		Final Presentation			S	0	0	0

**CPI, CV, SPI, SV Calculations:**

- **Cost Performance Index (CPI):** The cost performance index (CPI) is a measure of the conformance of the actual work completed (measured by its earned value) to the actual cost incurred:  $CPI = EV / AC$ .
- **Schedule Performance Index (SPI):** The schedule performance index (SPI) is a measure of the conformance of actual progress (earned value) to the planned progress:  $SPI = EV / PV$ .
- **Cost Variance (CV):** The CV is the difference between the earned value of the work performed and the executed budget (Actual Cost).  $CV = EV - AC$ .
- **Schedule Variance (SV):** The SV is the difference between the earned value of the work performed and the planned value of the work scheduled.  $SV = EV - PV$
- SPI and CPI less than 1 and SV and CV negative refers to something is wrong with respect to schedule and cost in the project.

	ACWP	BCWP	BCWS
TOTAL SUM	15900	17710	25300
CPI	CV	SPI	SV
1.113836478	1810	0.7	-7590

**Earned value analysis Conclusion:**

Since CPI is 1.113836478 i.e. greater than 1, this means the project is not over budget, and instead it is under budget.

Since CV is 1810 i.e. not negative, this means the project is not over budget, and instead it is under budget.

Since SPI is 0.7 i.e. less than 1, this means the project is behind schedule.

Since SV is -7590 i.e. negative, this means the project is behind schedule.
